

HOW TO JUMP START YOUR CAR

SAFETY FIRST

Wear protective gloves when jump-starting your car.

If the battery appears damaged in any way, don't attempt to jump-start.

WHAT YOU'LL NEED

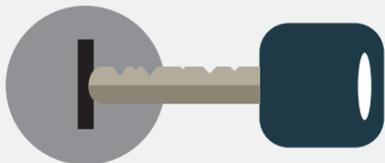

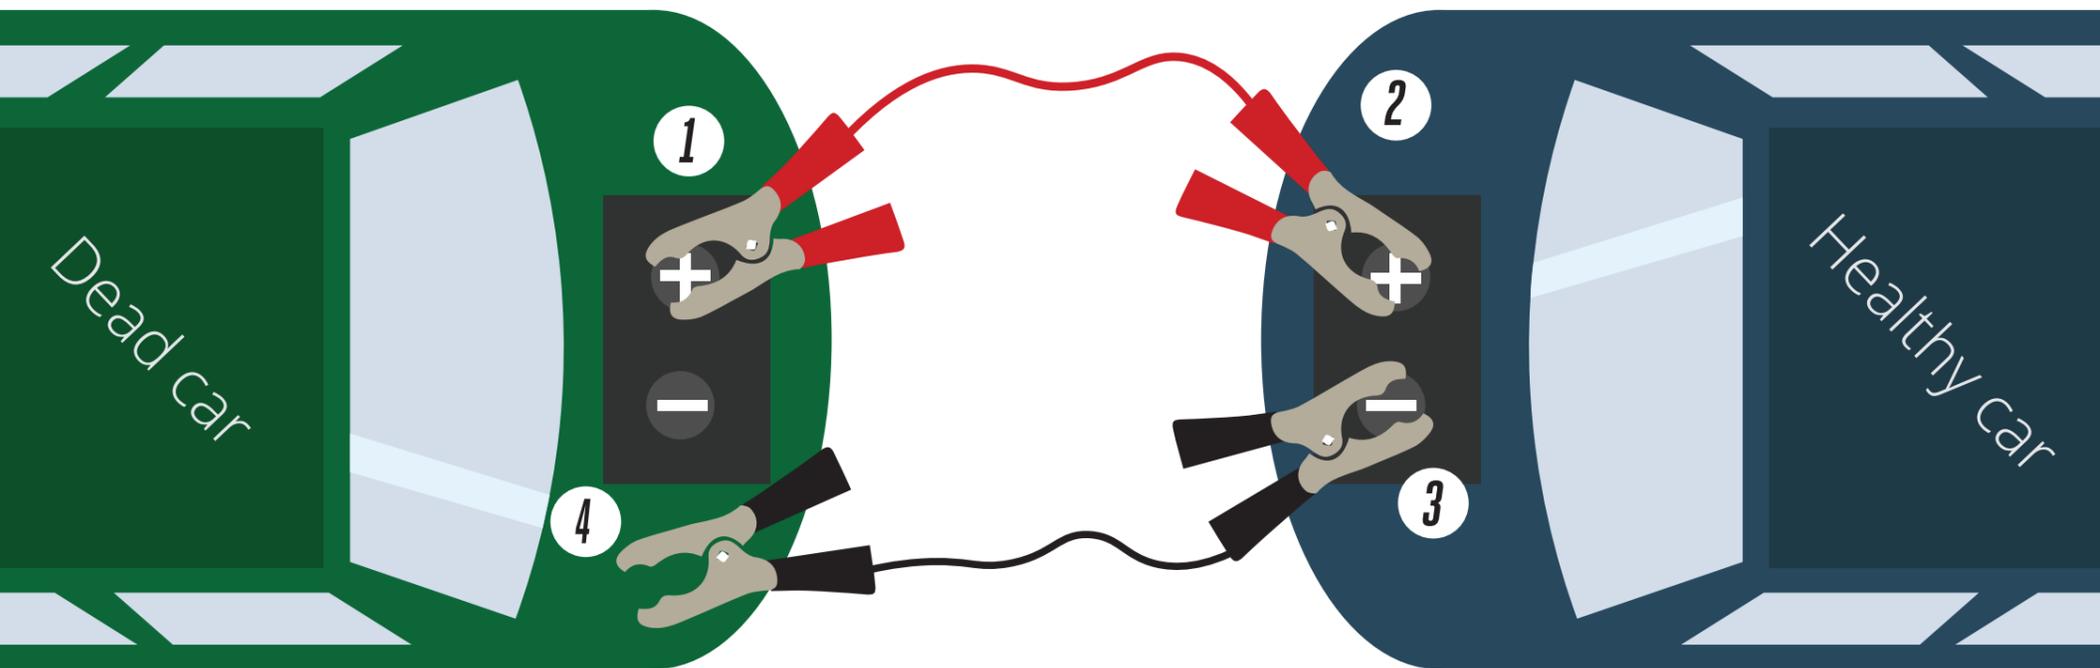

A set of jump leads

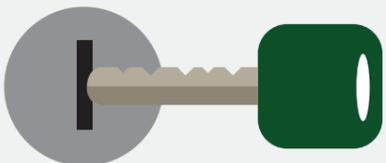

A car with a healthy battery

WHAT TO DO

1. RED on dead (+)
2. RED on healthy (+)
3. BLACK on healthy (-)
4. BLACK on bare metal

Turn on the ignition of the healthy car.

Give it a minute, then try the ignition of the car with the dead battery.

Wait at least 10 minutes with both engines running. Remove jump leads in order 4-3-2-1.
